

Winter 2021 Weave-Along Doubleweave Ruana

Pattern Corrections and Clarifications Updated 2-27-21

Page 2

The individual tally of the brown, cream, and orange ends are slightly off. The total number of ends is correct. The correct ends should be: 97 brown, 72, cream, and 31, orange.

These changes marginally affect the total amount of warp yardage required: 2 yds less of brown and orange and 4 yds more of cream.

Page 3

Chart 3 Accent Area: the colors in the holes should be reversed. Chart 1 and 2 are correct, so you should already have the back heddle hole threaded correctly.

To proceed, pull through the 4 ends to the front, 3 brown and 1 orange and thread the single orange in the FRONT heddle hole.

Corrected chart:

I eliminated the arrows on the back heddle since that step has been completed.

In the explanation you should be moving the yarn to the **LEFT** hole as indicated in the chart not “right” as written in the caption.

Page 6

Under Thread Front Heddle:

I state I’m working “right-to-left”, but I’m actually am working left-to-right.

Under Placing Pick-Up Sticks, Pick-Up Stick A:

On Pick-Up A in the left-most brown stripe, pick up 9 brown ends, not 8.

Working right-to-left when facing the loom pick up one of each pair using the following color order: 8 brown, 12, tan, 8 cream, 20, read, 11, orange, **9** brown, 12 tan, 8 cream.

If for any reason you made a threading error and/or modified the pattern, pick up the yarns as they appear in the holes in Heddle 2. The total number of ends and the color order on Heddle 2 holes and Pick-Up Stick A should match.

Page 8

Since the last pick of the colorwork on the back was woven on the bottom layer is with Heddle 1 down, if you start the flaps area sequence as written in the pattern (see page 8), the first pick of the solid stripes on the front on the bottom layer will be in the same shed.

This would be a better way to start that sequence.

1. Pick Up Stick B, shuttle 1 (lower layer)
2. Pick Up Stick A, shuttle 2 (upper layer)
3. Heddle 1 down, shuttle 1 (lower layer)
4. Heddle 2 up, shuttle 2 (upper layer)

If you end up with a doubled weft pick on the bottom layer at that transitions you can do a couple of things:

- Leave it and think of it as a pat on the shoulder from your less than perfect teacher.
- If that area happens to be a little crammed, you can cut out the extra yarn by snipping it in the middle and pulling out either end and needle weaving the tail back in.
- If that area happens to be a little open, you can needle weave in a new weft end.
- I’ll add this to the pattern download page and the announcement.
